Professional Summary

Computer Science undergraduate with hands-on experience in software engineering through internships and full-stack projects. Experienced in developing web applications, RESTful APIs, and AI-powered solutions while collaborating in Agile teams. Familiar with AWS, AI-assisted development tools, prompt engineering, and foundational system design, with a passion for solving real-world engineering problems.

Education

B.Tech in Computer Science & Engineering (Full Stack), UPES Dehradun CGPA: 8.63/10	Aug 2023 – Present
12th, CBSE, SNVP Meerut Percentage: 90%	Apr 2022 – Mar 2023
10th, CBSE, SNVP Meerut Percentage: 91.2%	Apr 2020 – Mar 2021

Technical Skills

Programming Languages: Java, JavaScript, SQL, C
Frontend: React.js, HTML5, CSS3
Backend: Node.js, Express.js, RESTful APIs, JWT Authentication
Databases: MongoDB, MySQL
Cloud & AI-Assisted Development: AWS (Basic), GitHub Copilot, ChatGPT, Prompt Engineering, Kiro, Antigravity
Core Areas: Data Structures & Algorithms, Database Management Systems, Operating Systems, Software Engineering,
Tools/Platforms: Git, GitHub, Docker, Postman, VS Code

Experience

Xebia Software Development Intern	Jun 2026 – Jul 2026 Duration: 8 Weeks
---	--

- Developed reusable RESTful API services and request/response models across 12+ frontend modules.
- Collaborated in Agile teams on feature development, code reviews, and Git-based workflows.
- Tested API integrations using Postman and assisted in debugging development issues.

Naiyo24 Full Stack Development Intern	Apr 2026 – Jun 2026 Duration: 8 Weeks
---	--

- Implemented Flutter UI screens from provided product designs and functional requirements.
- Collaborated with the development team to deliver features following the existing application architecture.
- Leveraged GitHub Copilot and ChatGPT to accelerate implementation, debugging, and feature development while delivering assigned tasks.

Technical Projects

InsightLoop – AI-Powered Product Intelligence Platform Tech Stack: React.js, Node.js, Express.js, PostgreSQL, JWT, Render	Jul 2026 – Present GitHub
--	------------------------------

- Developed RESTful APIs and backend services for collecting, processing, and managing customer feedback from multiple data sources.
- Implemented JWT authentication and modular backend APIs to support secure and maintainable application development.
- Built an AI-powered application with interactive dashboards, leveraging prompt engineering and AI-assisted development tools to generate structured customer insights.

MarketMesh – Hyperlocal Reverse Auction Marketplace Tech Stack: Node.js, Express.js, MongoDB Atlas, Socket.io, JWT, Postman	Jan 2026 – May 2026 GitHub
--	-------------------------------

- Developed RESTful APIs using Node.js, Express.js, and MongoDB for authentication, RFQ management, bidding, messaging, and administrative operations.
- Implemented JWT-based authentication and MongoDB GeoJSON queries to enable secure, location-based vendor discovery.
- Developed a real-time reverse auction system using Socket.io and validated application workflows using Postman during development.

Certifications & Accomplishments

Co-Author: *Navigating the Urban Landscape: IoT & UAV Integration in Smart Cities* (Springer, 2024)
Experience in literature review, technical documentation, and structured research analysis.
